DETAILED ACTION

Election/Restrictions

1. Applicant's election of species requirement in the reply filed on 8/29/05 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Applicant's election without traverse of Species 5- Figure 9 in the reply filed on 8/29/05 is acknowledged.
3. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 11,12, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by CHIEN (5570946). Chien shows in Fig.3 a safety hat, a safety element “74” and EL lighting element “7” that illuminates the safety element stripes “74” (see also the discussion in col.6, lines 58-67 concerning the use of safety signals). Re claim 12, note that Chien’s safety stripes are recognized as traffic caution and safety symbols. Re claim 14, note in Fig.3 of Chien the hard outer layer “1” of the safety hat.
6. Claim 15 is rejected under 35 U.S.C. 102(b) as being anticipated by RICHARDSON (5564128). Note that the method of claim 1 is inherently practiced by the wearer of the firefighter’s helmet shown in Fig.2 of Richardson. See also the discussion of the EL safety symbol “16” in col.3, lines 35-46.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. Claim 13 is rejected under 35 U.S.C. 103(a) as being unpatentable over CHIEN (5570946) as applied to claim 11 above, and further in view of

CHIEN (5479325). Chien (5570946) shows the invention substantially as claimed except for the hat main body comprising a flexible material. Chien (5479325) shows that it is known in the art to use the EL lighting of safety hats on both rigid and flexible hat bodies as shown in Fig.1 (rigid) and Fig.2 (flexible). It would have been obvious to one of ordinary skill in the art at the time of the invention to substitute a flexible material for Chien (5570946) rigid material as taught by Chien (5479325) for the purpose and advantage of using EL safety lighting on both rigid and flexible hat bodies.
